

STRUCTA WIRE PRODUCTS

RECYCLED STEEL CONTENT

1395 North Grandview Hwy Vancouver, BC V5N 1N2 T 1-800-887-4708

Structa Wire Corp. is proud to support the LEED program which aims to improve the environmental and economic performance of commercial and residential buildings. The use of Structa products can help projects accumulate points in the Recycled Content category.

Structa Wire Corp. manufactures the following products:

Structalath III

Structalath Twin Trac

Mega Lath

V Truss Walls & Ceilings (Structa Rib Lath)

Structacorner

Structa V Truss

All of our welded wire products are manufactured from hot dipped galvanized low-carbon cold drawn steel wire.

Recycled content used in the production of Structa welded wire products are in compliance with the Requirement for Environmental and Recycled Content Materials. Structa suppliers have indicated that their steel contains 60% recycled scrap steel as follows;

- 10% originates from post-industrial source
- 90% is of post-consumer origin
